

Digital Safety for Women

She shouldn't have to wait for the harm to find help.

Rakshana 24/7 monitors the internet for threats targeting you and alerts you before the harassment reaches your inbox, your phone, or your door.

"I am scared, so I am protected."

70%+

of cyber harassment comes from someone the victim knows

600M+

women in India are potential targets with limited digital literacy

<5%

of cyber crimes against women are ever reported

0

existing tools that detect threats before they reach the victim

THE REALITY

This isn't a technology problem. It's a silence problem.

Every day, women across India absorb digital harassment and move on — because the path from "something happened to me" to "I got help" is impossibly wide.

11

A woman in a Tier 2 city receives a morphed image of herself on WhatsApp. She doesn't know if it's a crime. She doesn't know who to call. She googles "cyber crime complaint India" and lands on a portal that takes 20 minutes to fill, asks for an FIR number she doesn't have, and gives zero feedback after submission. She closes the tab. Nothing happens.

This happens thousands of times every day across India.

1

Detection Gap

Stalkerware, deepfakes, doxxing

2

Accessibility Gap

Cyber Crime Portal is not

3

Response Gap

Even if she reports, she has no

— by the time a woman realises she's being targeted, the damage is already spreading. There is no early warning system. Nobody is watching the signals before the explosion.

mobile-first, not truly vernacular, not intuitive. A woman in rural Karnataka who speaks only Kannada on a budget Android with 3G — that portal is effectively invisible to her.

idea what happens next. No case tracking, no acknowledgment, no counselling redirect. The system treats it as a data entry problem, not a human problem.

OUR ANSWER

Don't wait for the storm. Watch the clouds.

Rakshana 24/7 doesn't wait for a woman to come to us after something happens. We monitor publicly available signals and alert her proactively — before the harassment reaches her.

Surface Monitoring

We scan Telegram channels, paste sites, and public forums for your phone number, name, or photos appearing in suspicious contexts.

Threat Intelligence

NLP-powered contextual scoring — not just keyword matching. We understand whether a mention is casual or dangerous. Score: 0-100, graduated, never binary.

Instant Alert + Action

Every alert comes with what to screenshot, which laws apply, how to file anonymously, and who to contact. The alert and the action are one atomic unit.

THE PIPELINE

From registration to protection in 5 steps.

1

Register Your Digital Fingerprint

Your phone number, a selfie, your social handles. We hash and encrypt everything — raw data is never stored. Your fingerprint is your shield.

2

Continuous Background Monitoring

Our scanner engine runs every 4 hours across Telegram public channels, paste sites, and forums — looking for your fingerprint in suspicious contexts.

3

NLP Threat Scoring

Every match is contextually analysed. "Priya's number is +91-XXXX" in a contact-sharing group vs the same number in a doxxing thread — our NLP engine knows the difference.

4

Graduated Alert Delivery

Score > 40: dashboard update. Score > 70: email alert with action guide. Score > 90: your trusted contacts are notified. Never binary, never panic-inducing.

5

Action + Legal + Support

Every alert tells you what law was broken, what to screenshot, how to file an anonymous complaint at cybercrime.gov.in, and connects you to helplines — all in your language.

She needs something that is already watching when she is asleep.

Rakshana 24/7 is that something. Start your protection now
— it takes 2 minutes.

Create Your Shield

[Legal Rights & Cyber Law](#) · [Resources](#) · [Report Anonymously](#)

"Light that travels ahead of the harm."

LEGAL REFERENCE

Know Your Rights. Know the Law.

Every Indian woman has legal protection against cyber crimes. Here is every law, section, and helpline you need — in plain language.

YOUR CONSTITUTIONAL RIGHTS

Rights Every Woman Has Online

These rights are guaranteed by the Constitution of India and enforced by law. No one can take them away.

Right to Privacy

Article 21 of the Constitution. Your personal data, images, conversations, and location are protected. No one can share them without your consent.

Right to Dignity

Article 21 protects your dignity. Online harassment, morphing, stalking, and defamation are violations of this fundamental right.

Right to File FIR

Police MUST register your FIR. If they refuse, approach the Superintendent of Police or file through cybercrime.gov.in directly.

Right to Zero FIR

You can file an FIR at ANY police station in India — not just your local one. This is called a Zero FIR. The police must accept it.

INDIAN CYBER LAW

Laws That Protect You

These are the specific legal sections that apply to cyber crimes against women in India. Screenshot this page — it's your legal toolkit.

🔍 Search laws (e.g. stalking, morphed photos, blackmail...)

IPC / BNS

Cyber Stalking

Section 354D IPC — Stalking | Section 78 BNS (New Law)

If someone repeatedly contacts you, monitors your internet or phone usage, watches or follows you using electronic means, or tracks your movements — this is a criminal offence.

Punishment: Up to 3 years imprisonment + fine (first offence). Up to 5 years for repeat offenders.

WhatsApp Instagram Location tracking Spyware

IT ACT

Morphed / Manipulated Images & Deepfakes

Section 66E IT Act — Privacy Violation | Section 67/67A — Obscene Content

Publishing or sharing someone's morphed, manipulated, or AI-generated (deepfake) intimate images is a serious criminal offence. This includes creating, distributing, or even possessing such content.

Punishment: Section 66E: Up to 3 years + ₹2 lakh fine. Section 67A: Up to 7 years + ₹10 lakh fine.

Deepfakes Morphed photos Revenge porn AI-generated

IT ACT

Doxxing — Leaking Personal Information

[Section 66E IT Act — Violation of Privacy](#) | [Section 72 — Breach of Confidentiality](#)

Publishing someone's phone number, address, Aadhaar details, photos, or any personal information without consent is illegal. This includes sharing it on Telegram groups, WhatsApp, or any public platform.

Punishment: Up to 3 years imprisonment + ₹2 lakh fine.

Phone leak Address leak Telegram groups Data dumps

IT ACT

Fake Profile / Identity Theft

[Section 66D IT Act — Cheating by Personation Using Computer](#)

Creating a fake profile using someone else's name, photo, or identity is identity theft. This includes catfish accounts, fake Instagram/Facebook profiles, and impersonation on dating apps.

Punishment: Up to 3 years imprisonment + ₹1 lakh fine.

Fake Instagram Catfish profiles Dating app scams

IPC / BNS

Online Harassment & Abusive Messages

[Section 354A IPC — Sexual Harassment](#) | [Section 509 IPC — Outraging Modesty](#) | [Section 67 IT Act](#)

Sending sexually explicit messages, abusive comments, rape threats, or sustained harassment campaigns online are criminal offences under multiple sections of Indian law.

Punishment: Section 354A: Up to 3 years. Section 509: Up to 3 years. Section 67 IT Act: Up to 5 years + ₹10 lakh fine.

DMs Comments Trolling campaigns Rape threats

IPC / BNS

Blackmail & Sextortion

[Section 383/384 IPC — Extortion](#) | [Section 506 — Criminal Intimidation](#) | [Section 66E IT Act](#)

Threatening to release intimate images, personal data, or other information unless the victim pays money or complies with demands is extortion — a serious criminal offence.

Punishment: Section 384: Up to 3 years + fine. Section 506: Up to 7 years if threatened with death or grievous harm.

Sextortion Threatening DMs Money demands

IPC / BNS

Death Threats & Criminal Intimidation

[Section 503 IPC — Criminal Intimidation](#) | [Section 506 — Punishment](#)

Threatening someone with death, injury, destruction of property, or harm to reputation through any electronic means is criminal intimidation. Online threats carry the same weight as in-person threats.

Punishment: Up to 2 years (general). Up to 7 years if threat involves death or grievous hurt.

Death threats Acid attack threats Rape threats

IT ACT

Hacking & Unauthorized Access

[Section 66 IT Act — Computer Related Offences](#) | [Section 43 — Penalty for Damage to Computer](#)

Accessing someone's email, social media accounts, phone, or computer without authorization is hacking under the IT Act. This includes guessing passwords, using keyloggers, or exploiting vulnerabilities.

Punishment: Section 66: Up to 3 years + ₹5 lakh fine. Section 43: Compensation up to ₹1 crore.

Email hacking Social media takeover Spyware

IT ACT

Financial Fraud / UPI Scam

Section 66C IT Act — Identity Theft | Section 66D — Cheating by Personation

Using someone's identity, UPI ID, or bank details to commit fraud. Includes phishing attacks that steal OTPs, fake payment links, and impersonating banks or companies.

Punishment: Up to 3 years + ₹1 lakh fine per section.

UPI fraud Phishing Fake payment links

IPC / BNS

Voyeurism — Secret Recording

Section 354C IPC — Voyeurism | Section 77 BNS

Watching or recording a woman in a private act without her consent, or distributing such recordings, is a criminal offence. Includes hidden cameras, screen recordings of video calls, etc.

Punishment: First offence: 1-3 years. Repeat offence: 3-7 years + fine.

Hidden cameras Video call recordings Bathroom cameras

STEP-BY-STEP GUIDE

How to File a Cyber Crime Complaint

You don't need a lawyer. You don't need technical knowledge. Follow these steps.

1

Collect Evidence FIRST

Before filing, take screenshots of everything — messages, profiles, URLs, timestamps. Use Rakshana's "Copy Evidence" button from your alert detail page. Evidence can be deleted by the accused later, so capture it NOW.

2

File Online at cybercrime.gov.in

Go to cybercrime.gov.in → "Report Other Cyber Crime" or "Report Women/Child Related Crime". Fill in details. You will get an acknowledgement number. Save it.

3

File FIR at Local Police Station

Take a printout of your online complaint + all evidence screenshots. Visit your nearest police station and file an FIR. If they refuse, ask for a written refusal and approach the SP or Magistrate (Section 156(3) CrPC).

4

File Through National / State Cyber Cell

If local police are unhelpful, contact your state's Cyber Crime Cell directly. They have the technical expertise to investigate digital evidence, IP traces, and social media data.

5

Use Rakshana's Automatic Evidence

If your Rakshana scan detected the threat, all evidence is already encrypted and timestamped. You can share the alert report as legally admissible evidence under Section 65B of the Indian Evidence Act (digital evidence certificate).

WHY YOUR DATA WAS EXPOSED

Your email was exposed in a confirmed data breach at Wattpad (2020).

WHAT WAS FOUND

Data breach detected: Wattpad

In June 2020, story-sharing platform Wattpad was breached exposing 271 million user records including email addresses, bcrypt-hashed passwords, usernames, IP addresses, dates of birth, and genders.

Have I Been Pwned Database

Wattpad

DATA TYPES EXPOSED

Email addresses

Passwords

U usernames

IP addresses

Dates of birth

Genders

Total affected: 270,784,079

RISK ASSESSMENT

IP addresses reveal approximate location history. Combined with date of birth and gender, this enables identity theft and account takeover attacks. This exposure means attackers could use your email for credential stuffing attacks, phishing campaigns, spam, or to reset passwords on other services.

Threat score: 64/100 (WATCH). Findings in this source: 1.

HOW IT WAS DETECTED

Scanned by Rakshana 24/7 Engine

Monitoring source: Have I Been Pwned Database

Detected: 21 February 2026 at 05:15 am

All evidence is encrypted and locked in Rakshana's secure vault.

What To Do Right Now

Step 1. Your personal information has been shared publicly. Screenshot the post NOW.

Step 2. Report the post on the platform for removal.

Step 3. File a complaint at cybercrime.gov.in — select 'Online Harassment'.

Step 4. Change passwords on all accounts immediately.

Step 5. Alert your trusted contacts.
